## New Door Machine!

Door Shop Manager Tim Webb points out the capabilities of the new door machine, which allows the crew (Tim, Kelvin & Chris) to easily handle 6/8, 7/0 and 8/0 doors.

The loader automatically loads the doors. In the machine, the 6-pack drill slides down the rail and drills six holes at one time for hinge screws - centered and straight.

The machine adjusts to either square-edged or beveled doors, so hinges will be mortised to be flush with either.

The door machine offers more automation and greater precision for improved efficiency and quality.
